Crime Prevention – Vehicle Crime

Vehicles today are by and large more difficult to steal than ever, unless the thief can access your key or fob to clone them. Keep your keys safe, out of view when at home, and away from your front door. It's not uncommon for car keys to be stolen from inside your home by thieves fishing for them with a stick and hook through the letterbox.

Electronic devices can be used to jam the electronic signal from your key fob to lock your vehicle. Always manually check your vehicle has locked before walking away.

If unsure, lock it manually, then scan the immediate area for anyone hanging around. If a potential thief who's watching feels they've been spotted, they'll probably move off.

When not in use, keep your electronic car key in a security pouch to prevent it being scanned by thieves to open and steal your car nearby.

Many modern vehicles are fitted with engine management diagnostic ports, which can unlock and start your vehicle. If your vehicle has this type of port, consider fitting a lockable cover.
